

Aluminium Lantern Roof

Glazing Systems

Creating Light, Airy Spaces

A Better Lantern Roof

The purpose designed Stratus aluminium lantern roof system is discreet yet stylish. Stratus allows light to flood into your home's interior, the ideal modern lantern solution, coupling sleek contemporary looks with truly outstanding performance.

Designed from the ground up around an innovative thermally broken system, it provides excellent thermal performance - keeping cool in the summer and warm in the winter - while delivering the architectural refinement you'd expect of a high end aluminium lantern system.

Whether you are building a new kitchen-diner extension or replacing an existing lantern roof, Stratus will help redefine your home, creating light and airy spaces for you to enjoy.

NEVER STAY TIRE

How it works

Design And Colour Options

Available in 2-way, 3-way or contemporary designs, with sizes up to 3m x 6m, this high end, high performance lantern roof is ideal for modern living. Stratus is ideal for fresh, bright interiors that want to be opened up and bathed in light.

Stratus comes in a choice of two hard-wearing exterior powder coated finishes, with the option of a white or grey interior finish.

For the ultimate in minimalism, the innovative contemporary style supports the ridge solely by the hip rafters, for an ultra slim, clean and modern look.

Glazing Systems

VERSATILE

3 way design
Max 3000mm x 6000mm

2 way design
Max 1500mm x 6000mm

Contemporary design
Max 1500mm x 3000mm

“A multifunctional room which can be used all year round for cooking, entertaining and relaxing. The Stratus lantern roof making a huge difference to the space.”

CONFIGURATIONS

How it works

Innovative Fully
Thermally Broken
Lantern Roof

SOLUTION
Glazing Systems

more thermally efficient than
conventional aluminium roof systems

INNOVATIVE

Thermal break technology ensures that Stratus is warm in the winter and cool in the summer. Every element of the lantern has an ultra-low conductive element that separates the inner and outer aluminium skin, helping keep heat transfer down, and your heating bills low.

533x

Polyamide nylon, glass composite thermal breaks are 533 times more thermally efficient than aluminium!

SOLUTION

How it works

Simply built better

Every element of the Stratus Thermal Lantern Roof has been designed to be exceptional. From the low profile 20" pitch that allows us to use purpose designed cappings that keep sightlines to a minimum - and your view of the sky maximised - to the discreet black finish of our perimeter beam, that ensures if you view the lantern from above all you'll see is glass and a discreet shadow line.

AESTHETICS

We care about the future...

APS takes its environmental responsibility seriously. We believe in reducing our impact and carbon foot print, which applies to our suppliers and our clients. We are accredited with ISO14001 and operate an environmental management system.

Material:

In terms of sustainability, aluminium is one of the best materials available. Its natural strength, lightness and durability makes it the ideal material for meeting architectural glazing requirements. For our own production, we use recyclable aluminium billet 100% of the time and all production waste is recycled. Our extrusions carry a life expectancy of 50 years. Significantly higher than other materials and of course, it's 100% recyclable.

The APS logo is rendered in a white, stylized, lowercase font with a slight shadow effect, positioned in the bottom left corner of the main image area.
